Intro – Appliance based passive solution (Hang off Span Port of Switch, Monitor requests to internet, Not a point of failure, doesn't introduce added latency, Full Saturated Gigabit of traffic) Proxy, Software as a Service

1. **Group Policy** – Show other groups/Use Demo Group, Show Grid, Click all sub categories & show custom categories, Talk to HTTPS, Ultra Surf, Safe Search, Micro Updates 10minute, Save-To feature, Block Page Override Icon
   Overrides – Import/Export, Categories, Start/End time, Reference Depth (w/YouTube)

2. **Users** – (Switch to All Assigned Users Group) Without LDAP Authentication, Use As Location, VLAN ID, Dynamic IP, Static IP, IP Range
   Groups – Manually create groups or merge with LDAP, Configure LDAP Sources & Show Sources, Back at Groups – Authentication, Show LDAP Sources & Objects (Speed), Alternate Days Policy, YouTube for Schools (**Filter Settings -> YouTube|Schools**), Block Overrides, Abuse Settings
   Managers – LDAP Integrated, Security Levels, Group Manager extra options

3. **Utilities** – <u>Logon Agents</u> – (*Our Logon Agents are a Domain based technology used to associate a user with an IP address or a range of IP addresses. They are Domain Based agents that live on the domain and execute through Group Policy Objects or Network Logon Scripts. They can be executed in a number of ways. Non Persistent – Execute in a millisecond and terminate, Persistent – Stay up and running.*) <u>Remote Agents</u> – (*Installed on the device and are for devices that are School owned and leave your network. Filter & Report on user. Uses a Go or No-Go allow on traffic requests using a proprietary lightweight UDP packet sent back to the nearest NetSpective box.*)
   Filter Settings -> Authentication <u>Mobile Portal w/ Pairing</u> – On the Network, Users assigned to Zones, Types of Portals, LDAP uses credentials but NTLM won't show portal page, Pairing for temporary or permanent user association via a Token, **Mobile Pairing** new and edited Device names, Reset Timeout, Unpair User, History
   Remote Agent -> Mobile Browser - <u>NetSpective Mobile Browser</u> – iPads on and off network
   Global Proxy – Filter all traffic on or off network, Proxy Auto-Configuration (PAC)

4. **Statistics** – On the box reporting, Chart Overviews & Recent Activities, Search Window
   Device Settings -> Logging – NetAuditor 3, Free with NetSpective for off the box Reporting, Syslog for processing logs in real time, Windows based Server/VM/Desktop
   NetAuditor Security Event Manager – Realtime **Dashboards**, Realtime **Monitors**, Interactive Interface, Filtering, Alarms & Delivery (Forensics Tool)
   Configure Reports – Save custom reports or schedule automated reports, Formats, Customization options, Filters,
   Security Managers – Create new or sync with NetSpective, Configure to only see & run reports they want
   Completed Reports – Show multiple reports, runs quickly, store reports based on time and the size of your hard drive, log storage independent from report storage

Easier   Faster   Better
